

Let us extend a warm and personal welcome to you. We want to provide you with the finest health care and we'll offer you many informative and entertaining educational opportunities.

WHY?

First, you'll want to make informed decisions regarding your health. During the course of your care you'll be presented with several choices that will affect your ability to reach your individual health objectives.

Secondly, this information will be useful in making decisions about your health for the rest of your life.

To begin this process, here are a few important terms and procedures as you begin care:

FIRST VISIT

On your first visit we will gather information about you through our examinations and consultations. There will be someone here to assist you in each step along the way. If you're not sure about what we need, just ask. Nothing will be done without your consent and full understanding.

PATIENT EDUCATION

We will be giving you information and clinical data in the form of literature, personal and media presentations. These are designed to help you understand your own case and the procedures you'll experience in this office. Everything is brief and to the point. It is recommended that you read the material and keep it together for reference during the course of your care.

CHIROPRACTIC EDUCATION

Just as we need to know about you, you should know about us. Chiropractic currently consists of years of pre-Chiropractic college education in the biological

sciences, followed by another four years of Chiropractic education and clinical internship. Then we are required to attend many hours of post-graduate education each year for license renewal. On top of this, our office is frequently involved in various seminars to keep abreast of the latest information.

INTAKE FORMS

We have minimized intake forms in our office. However, there are clinical forms that must be filled out accurately for your health, legal and professional reasons. If you have questions, please ask.

HEALTH ATTITUDES

Your attitude about your health is as important to us as the specific reason you've consulted our office. Below are four prevalent health attitudes. Please mark the one that most closely reflects your personal values.

Treatment Only. I only consult a doctor when I have an ache or a pain and discontinue care as soon as it has cleared up.

Prevention. In addition to symptomatic treatment, I consult specialists occasionally to prevent problems from recurring.

Maintaining Health. I'm conscious about my health, diet, exercise, etc. and actively pursue these because I feel better, perform better and it maximizes my potential.

Family Health. I take an active part in assisting, informing, and maintaining health, with my family. I'm concerned with the long-term affects of good health.

Thank you. And again, we look forward to a healthy relationship with you.
